## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3 and 12-17, drawn to methods of treatment of heart failure.

Group II, claim(s) 4-11, drawn to peptide therapeutic for inhibiting phospholamban activity.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the peptide therapeutic of Group II is not required to perform the methods of Group I and as such the claims lack a corresponding special technical feature.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

#### **Group I**

Species A - mutations of PLB

Species B - sense PLB

Species C - antisense PLB

Species D - truncated PLB

Species E -- native PLB

Species F - antibody against PLB.

#### **Group II**

Transport peptide:

Species A - penetratin

Species B - adenovirus

Species C - bacterial based transport peptide

Species D - lipid vesicle based transport peptide

Art Unit: 1645

Linkage:

Species A - branched lysine backbone

Species B - peptide bond

Species C - disulfide bond

Cargo peptide

Species A - mutations of PLB

Species B - sense PLB

Species C - antisense PLB

Species D - truncated PLB

Species E -- native PLB

Species F - antibody against PLB.

Applicant is required, in reply to this action, to elect a single species from Group I to which the claims shall be restricted if no generic claim is finally held to be allowable. Should Applicants elect Group II applicant is required, in reply to this action, to elect a single species from Group I (a single combination of transport peptide/linkage/cargo peptide) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner.

The following claim(s) are generic:

Group I, claims 1, 2, 3, 12 and 13.

Group II, claims 6

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each of the species have different chemical constructions which lack a structural feature in common (protein, nucleic acid, antibody) and are made by different methods. Broadly, unity of invention exists where compounds included within a Markush group (1) share a common utility and (2) share a substantial structural feature disclosed as being essential to that utility." In the instant

Art Unit: 1645

case, the method and products rely upon polypeptides, polynucleotides and antibodies that are structurally distinct to such an extent and require non-coextensive searches to such an extent that they are considered.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

8. Any inquiry of a general nature or relating to the status of this general application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Papers relating to this application may be submitted to Technology Center 1600, Group 1640 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Should applicant wish to FAX a response, the current FAX number for Group 1600 is (703) 308-4242.
